

Community Health Worker Core Competency Training

*This course focuses on increasing the overall capacity of CHWs. The workshop is built upon the **10 core competencies** as defined by the **Massachusetts Board of Certification of Community Health Workers**.*

The course is led by CHI's team of seasoned instructors who have conducted CHW training locally, nationally, and globally. The team also includes instructors who are presently working as CHWs

*As we are in a particularly trying time, in order to be responsive to emerging needs, CHI is incorporating **new course content** relevant to the CHW role as it relates to the current public health, social and economic context.*

Apply at centerforhealthimpact.org!

Training consists of **4 live classes via Zoom**, and **8 self-paced online modules** with instructor guidance and support.
